

20% Increase in demand for IT consultants during Q2 2010 compared to Q2 2009. Data Warehousing and Java are hot skills in demand.

Consulting Information Technology (IT) jobs growth in Q2 of 2010 reached 20% higher compared to same period of 2009. During this quarter, every month recorded an increased number of IT job postings compared to 2009. (See Exhibit A)

According to Prabakaran Murugaiah, Founder and CEO of Corp-Corp.com, "the current trend shows that the demand for consulting technology jobs is increasing in the US". A detailed dynamic report by skill and state is available at http://www.corp-corp.com/press-release/Market_Report_2010-Q2.htm

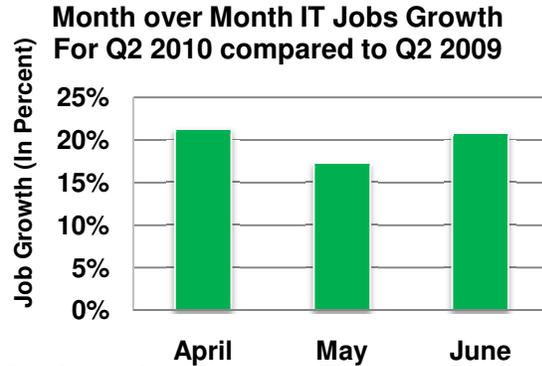

The top 10 states for technology job posting are California (CA), New Jersey (NJ), Texas (TX), New York (NY), Illinois (IL), Pennsylvania (PA), Virginia (VA), Massachusetts (MA), Georgia (GA), North Carolina (NC). (See Exhibit B).

An analysis of all the jobs that were opened during this period showed a sharp increase in skills that require Data Warehousing/ETL, Java, J2EE, QA/Testing, Siebel, etc.. Growth in areas like PeopleSoft, Oracle Apps, Database developers were in the 10-15% range. Skills like Mainframe, System administration and Unix/Shell Scripting saw a decline, overall (see Exhibit C).

The highest demand in the technology areas were seen in Data Warehousing and Java. Although a wide variety of technology skills are in demand, Java and .NET account for 25% of the jobs that were seeking talent. A complete distribution of skills in demand is shown below. (see Exhibit D).

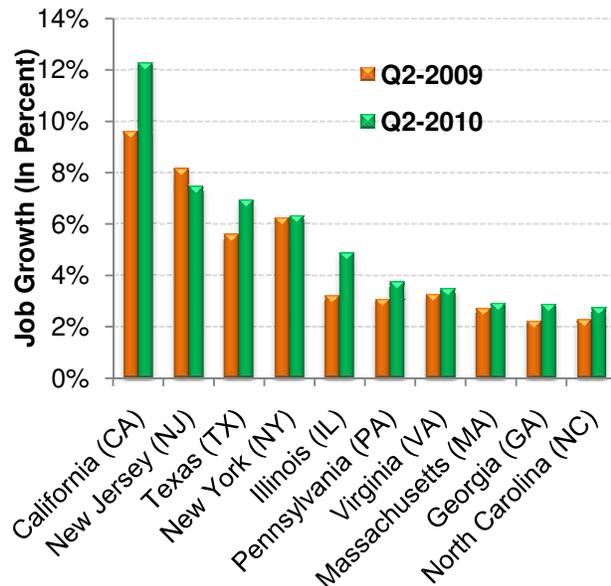

In conclusion, the overall demand for IT jobs continues to grow, while nationwide unemployment seems to be hovering around 9 %.
